

Out of Province & Non-Ontario Stock Immunization Record

Historical Dose Administration Scenarios

This functionality accounts for two historical Dose Administration (DA) scenarios:

- 1. Out of Province (OOP):** A client may have received one/both doses outside of Ontario and therefore it was not recorded in COVax_{ON}. The historical OOP dose(s) must be recorded in COVax_{ON}.
 - **This functionality is available to Vaccinators and Site Super User profiles but can only be conducted by PHUs**
 - **For a client that had Dose 1 OOP:** The client must contact their PHU to enter the dose 1 historical dose prior to booking their appointment for dose 2.
 - **For a client that had both doses or only Dose 2 OOP:** The client should contact their PHU to enter those historical doses.

Out of Province & Non-Ontario Stock Immunization Record

Historical Dose Administration Scenarios

2. Non-Ontario Stock (NOS): A client may have received one/both doses from Non-Ontario vaccine stock (i.e. Federal Stock used for Correctional Facilities, Military groups, Embassies, etc.). The historical NOS dose(s) can be recorded in COVax_{ON}.

- **This functionality is available to Vaccinators and Site Super User profiles but can only be conducted by PHUs or other groups approved by the MOH.**
- The location that conducted the vaccination will provide a list of data to be entered in COVax_{ON} by the PHU/approved group. If the client received their first dose via NOS, the historical entry needs to be made prior to booking their second dose appointment. If a client arrives onsite for their second dose and their first NOS dose was not documented, refer to the “**Errors and Deviations**” document for guidelines.
