Role:	

How long have you been using an EMR?

Salutation:

First Name:

Last Name:

Role:

How long have you been using an EMR?

Has this session been accredited by the College of Family Physicians (CFPC)? * No

Who is your target audience? *
New EMR Users
Intermediate EMR Users
Advanced EMR Users

Abstract Title: *
Optimizing Cancer Screening using your EMR – with a case study in OSCAR

Learning Objectives: *
1 Learn how to optimally use your EMR as the 'Source of Truth' for a patient's screening status
2 Learn to optimally use your EMR for average risk, high risk, ineligible patient and patients with cancer.
3 Learn how to calculate your preventative health bonus, manage office work flow and invitations to screen

Abstract: *

Team based care with optimal use of your EMR is key for primary care to manage the multiple demands on our time. This session will focus on Cancer Screening using the OSCAR EMR with a suggested most effective pathway for the following:

- set up your EMR as the 'source of truth' for cancer screening
- tools to keep it up to date
- using the EMR features for optimal ease of screening
- managing average risk patients
- managing high risk patients

- exclude patients from screening
- managing surveillance of patients with cancer
- performing audit for provider initiated 'invitations to screen' (patients invited via letter,email, phone call)
- office workflow for opportunistic screening (patient in office)
- calculating preventative care bonus

This presentation will use screenshots or if possible an on line demo of the above features.

It can be accompanied by a 'best practices' document for Cancer Screening using OSCAR in primary care that is the accumulation my efforts in collaboration with the Hamilton Family Heath Team, the OntarioMD EPEP program, the HNHB Regional Cancer Program and Cancer Care Ontario

I can also include an in-office facilitation tool that can be used to optimize in office cancer screening practices while using the EMR.

How did you hear about the Call for Email Invitation from OntarioMD
