Role:

How long have you been using an EMR?

Who is your target audience? \*

New EMR Users  
Intermediate EMR Users  
Advanced EMR Users

Abstract Title: \*

PrescribelT™: Improving Medication Management and Safety through e-Prescribing

Learning Objectives: \*

Medication Management and e-prescribing

Update on PrescribelT™ progress

Infoway's contribution to Health Canada's Joint Action Plan to Address the Opioid Crisis

Abstract: \*

\*For Keynote or Plenary Session\*

Prescription drug abuse – now a leading public health and safety concern for all jurisdictions – results in crime, loss of productivity, and adverse health outcomes. Between 2000 and 2010, Canadians' use of prescription opioids increased by 203% and today Canada is the world's second largest per capita consumer of narcotics and prescription opioids. Minister of Health Dr. Jane Philpott has responded by launching Canada's Action on Opioid Misuse, and as part of that, has called for the creation of Infoway's e-prescribing service to help reduce opioid misuse. Come learn about the significant progress made on PrescribelT™, Infoway's multi-jurisdiction e-prescribing service that will enable prescribers to electronically transmit a prescription to a patient's pharmacy of choice while safeguarding personal health

information. The session will also highlight Infoway's contribution to Health Canada's Joint Action Plan to Address the Opioid Crisis.
