

# QHR Accuro – Download Queries for Patients aged 12 - 17 years eligible for COVID-19 booster

There are 3 'OMD Youth COVID Vaccine' queries available for download from QHR Accuro Cloud:

- 1. OMD Youth COVID Vaccine (2 COVID doses rec'd, at least 168 days since last dose)
  - Youth 12-17 (inclusive) who have received 2 COVID-19 doses with at least 168 days since last COVID-19 dose
- 2. OMD Youth COVID Vaccine (IF immunocompromised, eligible for 3rd primary series dose 2 COVID doses rec'd, 56 days or more since last dose)
  - Youth 12-17 (inclusive) who have received 2 COVID-19 doses with at least 56 days since last COVID-19 dose \*(patient is eligible IF immunocompromised)
     \*Note: Queries search age range, administered quantity and date of last COVID-19 vaccine ONLY; clinicians will need to review lists to identify immunocompromised patients for appropriate follow-up.

## 3. OMD Youth COVID Vaccine (IF immunocompromised, eligible for booster - 3 or 4 COVID doses rec'd, at least 168 days since last dose)

Youth 12-17(inclusive) who have received 3 or 4 COVID-19 doses with at least 168 days since last COVID-19 dose \*(patient is eligible IF immunocompromised)
 \*Note: Queries search age range, administered quantity and date of last COVID-19 vaccine ONLY; clinicians will need to review lists to identify immunocompromised patients for appropriate follow-up.

### \*Tip: It is helpful to note/flag immunocompromised patients using structured, discrete data in your EMR for ease of identification and follow up which you may also wish to incorporate into the queries.

To import the queries published to the Accuro cloud, you will:

- 1. Click the Accuro Bullseye.
- 2. Highlight Reports.
- 3. Click 'Query Builder (Alerts)'.
