

Seamless, real-time access to the patient data you need.

Get dispensed drug information and other critical patient data from the convenience of your EMR

The Digital Health Drug Repository (DHDR) gives you convenient, real-time, secure access from your EMR to information about publicly funded drugs and pharmacy services, as well as all monitored drugs, regardless of payor, dispensed to your patients.

From your EMR, you can view:

- publicly funded, dispensed drugs, including those paid for by the Ontario Drug Benefit (ODB) program
- dispensed monitored drugs (narcotics and controlled substances), including opioids
- publicly funded pharmacy services, such as the MedsCheck Program medication reviews and pharmacist-administered vaccines (flu)

Save time with easier access:

- no need to navigate through multiple websites or log in to additional systems that require more usernames and passwords
- quick, secure and efficient access to clinically relevant, dispensed drug and pharmacy service information

Protect your patients:

- improved patient safety, outcomes and continuity of care
- decreased risk of medication errors, drug interactions, allergic reactions, and overdoses
- more efficient medication reconciliation in case of recalls
- a partial record of dispensed prescriptions and pharmacy services for more informed clinical decisions and less need to rely on patients' memories

Get access to DHDR
from your EMR

Get the patient data you need from the convenience of your EMR with EMR Contextual Launch Services

Access Ontario Health digital tools directly from your EMR. EMR Contextual Launch services are now available.

EMR Contextual Launch is your gateway to a set of Ontario Health digital tools that hold patient data you need without leaving your OMD-certified EMR. This means a quicker and more seamless way to view the data without the need to sign into external portals.

What you can access through EMR Contextual Launch today*, with more solutions available soon:

ClinicalConnect: Real-time access to patients' lab tests, diagnostic images, and medication records from hospitals, Home & Community Care Services and Regional Cancer Programs in Southwest Ontario.

OTN eConsult: A private and secure community for practicing virtual care using a variety of ways to communicate with and care for patients, connect with peers and specialists.

CCO eReports: Cancer Care Ontario – Primary Care Reports allows physicians to find screening information for breast, cervical and colorectal cancers to help them improve their cancer screening rates and appropriate follow-up.

SADIE: Special Authorization Digital Information Exchange (SADIE) is a secure, online portal for Ontario physicians and nurse practitioners to electronically submit and track Exceptional Access Program (EAP) requests for drug coverage.

Coming Soon!

eForms Ontario: A secure, efficient, and trackable way to send personal health information to organizations using the most up-to-date versions of the commonly used forms from the Ministry of Health and the Ministry of Transportation.

eOrdering Ontario with OLIS MORE: eOrdering Ontario is an electronic lab ordering solution that replaces paper and fax-based lab requisitions with a seamless digital workflow. Launch OLIS-MORE — from your EMR Ontario OLIS Mobile Orders and Results Entry to Submit lab test orders and receive results directly into OLIS.
