Diabetes Assessment Billed

I4C Indicator CDM-DIAB-004: Diabetes Assessment Billed v 2.0

Category: CDM/Diabetes

Purpose:

This indicator is used to identify diabetic patients who may be due for diabetic management assessment and who may eligible to have a K030 service code billed.

Source:

Based on HQO MyPractice: Primary Care Report version 3 (December 2018).

Base Population:

All patients with an Active demographic status recorded in the EMR who have a confirmed diabetes diagnosis through entry of an appropriate diagnosis code.

Indicator Segments:

No K030 Billed: Count of diabetic patients without any K030 service codes submitted for billing in the past 12 months.

1-2 K030 Billed: Count of diabetic patients with one or two K030 service codes submitted for billing in the past 12 months.

3+ K030 Billed: Count of diabetic patients with three or more K030 service codes submitted for billing in the past 12 months.

For a complete list of diagnosis codes used to identify Diabetes, see Diabetes Identification (CDM-DIAB-001).

Suggested Indicator Use:

Physician or practice use of this indicator is to identify diabetic patients who may be due for a diabetic management assessment or patients who have received an assessment and are eligible to have a K030 service code billed.
