Help with signing up for secure health service access.

OntarioMD offers primary care clinicians and their staff 10 free digital health services to help streamline workflows, enhance patient care, and stay current with the latest tools and practices.

Discover what each of these free services can do for your clinic – **flip to learn more.**

OntarioMD (OMD) offers these 10 free services to support primary care clinicians and their staff to leverage technology to better run their practices.

20+ Years of Digital Health Knowledge. OMD does more than certify EMRs. We identify and address your technological pain points, train you and clinic staff, suggest efficiency tips, and ensure you're heard.

AI Expertise for Primary Care. Our insights from leading the first-ever provincial AI scribe evaluation project can guide you in choosing an AI scribe tool.

Privacy & Security Awareness and Education Credits. Protect your practice from cyberthreats by knowing the latest privacy and cybersecurity developments and best practices with our online training.

Networking Opportunities. Attend our one-of-a-kind OMD Educates: Digital Health Conference to mingle with colleagues and learn tips on using your EMR, AI, and other technologies.

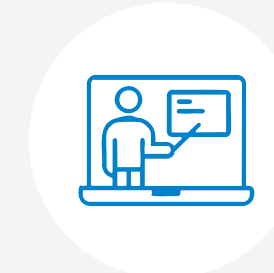

Peer Leaders. Consult with one of our 50+ physicians, nurses or clinic executives for digital health mentorship.

OMD Advisory Service. The team can help choose the technology that's right for you, manage changes, and optimize technology use.

The views expressed in this publication are the views of OntarioMD and do not necessarily reflect those of the Province.

OntarioMD is a wholly owned subsidiary of the Ontario Medical Association and funded by the Ministry of Health.

Online Digital Health Training and Education. Browse our knowledge repository of webinars, videos and other resources on [OMDEducates.com](https://omdeducates.com).

Certified EMRs for a Secure Gateway to Patient Data. Only OMD-certified EMRs meet provincial requirements for seamless access to dispensed drug info (Digital Health Drug Repository), hospital reports (Heath Report Manager®), lab results (Ontario Laboratories Information System), specialist advice (eConsult), and forms pre-populated with patient data (eForms). More apps are coming!

Quality Improvement. Have the OMD Advisory Service Team assess your practice to pinpoint challenges and recommend improvements (that can be used for CPSO quality improvement projects).

Facilitated Access to Digital Health Services and Information. We can help you get secure access to multiple digital health services by signing up for Digital Health Credentials/ONE® ID username and password with Ontario Health.
