OntarioMD Products & Services for OHTs

Training and Education

Learn how to use digital and virtual care tools safely and effectively

OntarioMD is committed to helping raise awareness to physicians and their practice staff about digital health through training and education via conferences, webinars, and the Privacy & Security Training Module on OntarioMD.ca. Information about virtual care with a list of virtual care tools, training videos, and webinars led by experienced virtual care users can be found on OntarioMD.vc.

Peer Leader Advice

Talk to a physician, nurse or clinic manager who is an expert user to advance your use of digital health

OntarioMD has created a network of over 60 Peer Leaders made up of physicians, nurse practitioners, nurses and clinic managers who are expert users of OntarioMD-certified EMRs and other digital health and virtual care tools. They are available to help community-based practices realize more clinical value from digital care.

Digital Health Services

Sign up for one or multiple services at once

Health Report Manager

Health Report Manager (HRM®) is an award-winning digital health tool integrated with your EMR. It improves communication among health care providers by enabling practices to securely receive patient reports, such as discharge summaries, electronically from hospitals and other health care facilities directly into their EMRs.

ONE® ID

Provides secure access to multiple digital health services using one username and password.

EMR-Integrated eConsult

eConsult is a tool that provides physicians and nurse practitioners with timely access to specialist advice and often eliminates the need to send patients for an in-person specialist visit.

OLIS

Clinicians using an OntarioMD-certified EMR can access the latest lab results for their patients or perform patient queries through Ontario Laboratories Information System (OLIS).

OntarioMD.ca

Register for OntarioMD.ca for access to the Privacy & Security Training Module and the Health Card Validation app. You can also complete an EMR Progress Assessment to learn how well you are using your EMR and where you may want to improve and save your user agreements in eAgreements.

i4C

Insights4Care (i4C) provides clinicians with tools and services to gain better insights about their patients and to make improvements in their care. The i4C Dashboard is an EMR-integrated population health management tool based on your real-time EMR data. The i4C Advisory Service provides advice to all users of certified EMRs.
