

Diabetes Management Incentive Billed

I4C Indicator CDM-DIAB-005: Diabetes Management Incentive Billed v 2.0

Category: CDM/Diabetes

Purpose:

This indicator is used to identify diabetic patients for whom a diabetes management incentive (Q040) has not been billed in the past 12 months.

Source:

Based on HQO MyPractice: Primary Care Report version 3 (December 2018).

Base Population:

All patients with an Active demographic status recorded in the EMR who have a confirmed diabetes diagnosis through entry of an appropriate diagnosis code.

Indicator Segments:

Q040 Billed: Count of diabetic patients WITH a Diabetes Management Incentive code Q040 submitted for billing in the past 12 months.

Q040 Not Billed: Count of diabetic patients WITHOUT a Diabetes Management Incentive code Q040 submitted for billing in the past 12 months.

For a complete list of diagnosis codes used to identify Diabetes, see Diabetes Identification (CDM-DIAB-001).

Suggested Indicator Use:

Practice use of this indicator is to identify diabetic patients for whom a Diabetes Management Incentive code Q040 may be submitted.
