

Allergies Recorded

I4C Indicator PHC-ALRG-001: Allergies Recorded v 1.1

Category: Preventive Health Care/Allergies

Purpose:

This indicator is used to identify patients without allergy information documented.

Source:

Based on the HQO indicator framework version published October 2015.

Base Population:

All patients with an Active demographic status recorded in the EMR.

Indicator Segments:

1+ Allergies: Count of patients WITH one or more specific drug or non-drug allergies documented.

No Known Allergies: Count of patients WITHOUT a specific drug or non-drug allergy documented AND WITH one or more entries documented indicating a patient has no known allergies or no known drug allergies, such as “No Known Allergies”, “No Known Drug Allergies”, “NKA”, or “NKDA”.

Allergies not recorded: Count of patients WITHOUT a specific drug or non-drug allergy documented AND WITHOUT an entry of No Known Allergies or No Known Drug Allergies documented.

Suggested Indicator Use:

Physician or practice use of this indicator is to identify or recall patients without allergy information documented.
