A <b>dot separator</b> is used to separate category from subcategory in representing a code. Some EMR offerings omit the dot separator in representing codes in data capture and EMR data searches. For these EMRs, vendors will omit the dot separator in searches and queries.</p> <p>A category code followed by an asterisk (e.g., 154*) means that the search should include the high-level category (154) along with all subcategories within the hierarchy (e.g., 154.0, 154.1, etc.)</p>
