INTRODUCTION

The Continuing Care sector provides health care services and support through a mobile workforce, over 1,500 provider organizations, and more than 3,300 locations across the province. This care complements the work done by hospitals and doctors, and supports the Transformation Agenda at the community level. The Continuing Care sector is the broadest and most diverse health sector and includes:

- Community Care Access Centres
- Home Care Providers
- Community Support Providers
- Community Mental Health & Addiction Agencies
- Long-Term Care Homes

The sector represents a comprehensive network offering a range of care that may be delivered in the client's home or community. Care providers must collaborate across various organizations to coordinate client care.

Currently there is no consistency across the province in the content, definition, and format of the data used when exchanging Continuing Care requests for care and clinical care reports. This results in delays and inequality in client access to needed services due to process inefficiencies, multiple requests for the same client to provide the same pertinent profile information, lack of clarity in communication, and data inconsistencies. Additionally, because there is no uniform data for tracking delays across the care continuum, there are no reliable measures of the demand for certain services, delays in access, and, indeed, unmet demand. Service provider organizations are struggling to process, respond to, and manage requests given the volume of referrals and the amount of data collected on each referral.

In response to these pressures, hundreds of "point-to-point" request solutions are emerging and, due to a lack of articulated standards products, each solution is establishing their own ad hoc data sets and corresponding definitions.

The Request and Clinical Care Data Set Code Tables discussed in this document are proposed in response to a need by the Continuing Care sector to support a common data set for use when exchanging requests for care, sharing clinical care reports (including assessments and discharge summaries), and tracking delays in access.

Address Purpose

Code	Value	Description	Source	Last updated
BAD	Bad address	A flag indicating that the address is bad, in fact, useless.	OHCIDD v1.0.0 - Address Purpose	13-Oct-06
HP	Primary Home	Primary home to reach a person after business hours.	OHCIDD v1.0.0 - Address Purpose	13-Oct-06
TMP	Temporary address	A temporary address may be good for visit or mailing. Note that an address history can provide more detailed information.	OHCIDD v1.0.0 - Address Purpose	13-Oct-06
WP	Work Place	An office address. First choice for business related contacts during business hours.	OHCIDD v1.0.0 - Address Purpose	13-Oct-06
H	Home	A communication address at a home, attempted contacts for business purposes might intrude privacy and chances are one will contact family or other household members instead of the person one wishes to call. Typically used with urgent cases, or if no other contacts are available.	OHCIDD v1.0.0 - Address Purpose (proposed)	13-Oct-06

Priority Type

Code	Value	Description	Source	Last updated:
S	Stat	With highest priority (e.g., emergency).	HL7 v2.5 - 0027 (Priority)	06-Mar-07
A	ASAP	As soon as possible, next highest priority after stat.	HL7 v2.5 - 0027 (Priority)	06-Mar-07
R	Routine	Routine service, do at usual work hours.	HL7 v2.5 - 0027 (Priority)	06-Mar-07
P	Preoperative	Used to indicate that a service is to be performed prior to a scheduled surgery. When ordering a service and using the pre-op priority, a check is done to see the amount of time that must be allowed for performance of the service. When the order is placed, a message can be generated indicating the time needed for the service so that it is not ordered in conflict with a scheduled operation.	HL7 v2.5 - 0027 (Priority)	06-Mar-07
T	Timing critical	It is critical to come as close as possible to the requested time (e.g., for a through antimicrobial level).	HL7 v2.5 - 0027 (Priority)	06-Mar-07

PERCENT				
PPTH	Parts per thousand		UCUM - Units of Measure	17-Jan-07
PPM	Parts per million		UCUM - Units of Measure	17-Jan-07
PPB	Parts per billion		UCUM - Units of Measure	17-Jan-07
PPTR	Parts per trillion		UCUM - Units of Measure	17-Jan-07

Indicated non-metric units of measure

Artifact Control

Artifact Type:	Code Value List
Artifact Owner:	CC e-Health Standards
Artifact Title:	Unit of Measure Type
Version:	1.0
Version Date:	31-May-06
Version Status:	Approved
Reference Source:	HL7 V3 - Unit of Measure Case Insensitive
Documentation Reference:	CC Standards Master List - Mar08-07.xls

The following CC e-Health Standards code lists are leveraged from standards development organizations and licensing agreements should be arranged through them.

CC e-Health Standards	Count	Source
Aggravating Factor Type	8	SNOMED CT "Symptom relieving factors" 162473008 / CC e-Health Standards v1.0
Allergy Type	242	SNOMED CT - Jan 06 "Drug Allergy" 416098002 / "Food Allergen" 406465008 / "Allergy to Substance" 419199007
Body Part Type	116	SNOMED CT - Jan 2006 "Anatomical Structure" 91723000 / CC e-Health Standards v1.0
Care Site Type	23	CHCCD v2.1
Health Card Validation Code	32	Ministry of Health
Lab Test Category Code	8	LOINC 2006
Lab Test Code	51	LOINC 2006
Living Arrangement Type	10	CHCCD v2.1
Municipality Code	445	Values: MOMAH 2006 - Codes: CC e-Health Standards v1.0
Name Prefix Type	25	HISCA - Stakeholder Client Data Set v1.0
Name Suffix Type	5	HISCA - Stakeholder Client Data Set v1.0
Relieving Factor Type	17	SNOMED CT - "Symptom relieving factors" 162483007 / CC e-Health Standards v1.0
Request Source Type	28	CHCCD v2.1
Service Code	TBD	CCI
